PREFACE

For an informed management regime to ensure sustainability of the marine fisheries, it is essential not only to have reliable information on the status of marine fish resources along with fishing effort expended but also the number of fishing villages, landing centres, fisherfolk population, their occupation status, fishing crafts, fishing gears and other related parameters. With this objective, the Central Marine Fisheries Research Institute (CMFRI), Cochin has been conducting frame surveys at periodic intervals. Marine fisheries census on an all India basis was last conducted by CMFRI during May-July, 1980. Since the last census, the marine fisheries in India have witnessed both qualitative and quantitative changes. Post 1980 was also been a period where a number of management/policy interventions were made by the Government of India and the maritime states for ensuring sustainability, conservation of resources and to protect the interests of artisanal fishermen. Surely, the policies and interventions need to be reviewed and fine tuned in view of the highly dynamic nature of marine fisheries. For this a strong realtime and reliable database on various aspects of marine fisheries is essential. Recognising such a need, Department of Animal Husbandry, Dairying & Fisheries (DAHD&F), Ministry of Agriculture (MOA), Govt. of India, has taken up during the 10th Five Year Plan, a programme on Strengthening of Database and Information Networking for Indian Fisheries Sector in which Marine Fisheries Census is a major component. Recognising the expertise and experience of CMFRI in conducting such massive census surveys, the DAHD&F, MOA has entrusted the task of conducting the All India Marine Fisheries Census in the mainland to CMFRI.

Frame of the survey, namely, the marine fishing villages available with CMFRI was validated and updated with the latest information obtained from the respective maritime states. After identification of census parameters such as the population size, education, religion, occupation, number of crafts and number of gears etc., the necessary schedules were designed to collect information and these were approved by the Technical Monitoring Committee set up by DAHD&F, MOA.

The census was conducted in two phases with the first phase covering all the maritime states and Union Territories except Tamil Nadu and Pondicherry which were covered during second phase. The first phase was conducted during April-June, 2005 and the second during November-December, 2005. Over 300 CMFRI staff (Scientific and Technical) supervised the field level and zonal level census operations ensuring proper collection of relevant data. A total of 1,492 field enumerators mostly drawn from the fishing communities/fishing villages covered 3,202 marine fishing villages. After completion of the census in both the phases, the data were sent to headquarters for processing and preparation of reports. The software required for data entry, data validation and processing was developed by the scientists of Fisheries Resources Assessment Division, CMFRI.

The final report (containing two parts) on the marine fisheries census on an All India basis with respective state summaries including the scope, census parameters, their definitions, the types of schedules and instructions for collection of data was released by Shri.P.M.A. Hakeem, I.A.S., Secretary, DAHD&F, Ministry of Agriculture, Govt. of India on 25 July 2006 at Krishi Bhavan, New Delhi.

The rapid census exercises and the information supplied by the state department resulted in the finalization of 406 marine fishing villages spread over five districts in Maharashtra. Conscious efforts were made to avoid villages that were estuarial and other inland fishery regions. Further in the villages only those households were selected where at least one member of the family was involved in marine fishing or allied activities. This publication (Part III of the Census report) summarises the districtwise census data of Maharashtra covering a range of information right from the population bifurcation among Maharashtra fisherfolk to the ownership pattern of different craft, either full or partial. For a better understanding of the craft and gear ownership vis-à-vis occupational fishing, specially assorted information on number of households, which thrives by fishing without any wherewithal, has also been presented. Such incisive processing will be of much use to the planners and state authorities, whose primary objective is targeted towards the 'have-nots' of fishery. This report contains an exhaustive list of fishing villages of Maharashtra along with their socio-occupational profile including the craft and gear infrastructure segregated sector-wise.

I take this opportunity to thank the DAHD&F and the Indian Council of Agricultural Research (ICAR) for entrusting CMFRI with this onerous responsibility, which has been completed within a reasonable time span. Special mention is required to laud the role played by CMFRI personnel especially, Dr. V.D. Deshmukh, SIC, Mumbai Research Centre of CMFRI and the associated scientific and technical staff who made this venture a success with their dedicated and tireless efforts. I hope this report in this current shape and form will be of immense utility to the quintessential observer of Indian Marine Fishery.

SUMMARY

Marine Fisheries Census 2005 was carried out in five districts of Maharashtra state namely, Thane, Greater Mumbai, Raigad, Ratnagiri and Sindhudurg districts during April-June, 2005. The salient features are summarised below:

- There were 406 marine fishing villages in Maharashtra out of which 159 were in Raigad district, 88 in Ratnagiri, 71 in Sindhudurg, 61 in Thane and the remaining 27 in Greater Mumbai district.
- The total number of fishermen households was 65,313 of which 36% were in Raigad district, 27% in Thane, 15% in Greater Mumbai, 14% in Ratnagiri and the remaining 8% in Sindhudurg district.
- Marine fishermen population in Maharashtra was 319,397. Adult male constituted 35%, adult females 34% and children 31% of the population. Average population per village was 787 and the average family size was 4.89.
- In Maharashtra 30% of the fishermen possessed primary level of education, 31% secondary level and 7% possessed above secondary level of education. About 33% of the fishermen population have no formal education. Nearly 99% of the marine fisherfolk in Greater Mumbai district have some level of formal education followed by Sindhudurg (79%), Thane (66%), Raigad (56%) and Ratnagiri district (54%).
- About 86% of the fisherfolk families were Hindus and more than 50% of the fishermen families belonged to either scheduled caste or scheduled tribe.
- Active fishermen constituted 23% of the marine fisherfolk population out of which 76% were involved in full time fishing, 17% were part time fishers and the remaining 7% were occasionals. Most of the Raigad, Thane and Ratnagiri districts fishermen were full timers, while part time and occasional fishermen were maximum in Ratnagiri district.
- Nearly 50% of the fisherfolk earned their livelihood from allied activities like marketing, making/repairing nets, curing/processing, peeling, labour and other fishery related activities. Most of the males were engaged in occupation such as labour (32%), making/repairing nets (30%) and while female involvement is higher in marketing (70%) and curing/processing (15%).

- 14% of the fishermen families were having membership in co-operative societies out of which 84% having membership in fisheries co-operatives. Co-operative membership is maximum in Raigad district.
- Trawlers, gillnetters and dolnetters were the main crafts of the mechanized sector. There were 23,508 crafts **in the fishery** employed in marine fishing of which 13,053 were mechanized, 3,382 were motorized and the rest non-motorized. Gillnetters and Dolnetters account for 53% and trawlers 32% of the mechanized crafts. There were 4,219 mechanized trawlers of which 2,258 were in Greater Mumbai district.
- Maharashtra marine fisherfolk **owned** 19,249 crafts out of which 46% were mechanized, 18% were motorized and the remaining were non-motorized crafts. The number of families having shares in fishing crafts was maximum in Thane district followed by Greater Mumbai district.
- Important gears of Maharashtra were gill nets, fixed bagnets and seines. Sharing pattern is more visible in shore seines, traps and bagnets.
- Nearly 39% of the fisherfolk families involved in fishing possess neither craft nor gear.
- Only 4% of the fisherfolk families were found to own some electronic gadgets / life saving equipment.
- In Maharashtra, nearly 92% of the houses where marine fisherfolk families live were found to be pucca houses and in Sindhudurg district almost all the houses are pucca houses.
- There were nearly 927 educational institutions in all with an average of 2.3 institution per village mainly dominated by the primary schools. The maximum number was in the district of Raigad.
- About 92% of the marine fishing villages were electrified and 82% were connected by road.

There were only 54 ice factories located in the marine fishing villages of which 22 were in Ratnagiri district.
